## Important information

The 2021-2022 New York State budget was signed into law on April 19, 2021. Changes to New York State personal income tax have caused withholding tax changes for taxpayers with taxable income:

- more than \$2,155,350, and who are married filing jointly or a qualified widow(er);
- more than \$1,077,550, and who are single or married filing separately; or
- more than \$1,616,450, and who are head of household.

Accordingly, if you have employees subject to New York State personal income tax withholding who are earning more than the amounts listed above, revised withholding computation rules may affect your payrolls made on or after July 1, 2021.

## General changes for 2021

The 2021 New York State personal income tax rate schedules have been revised to reflect certain income tax rate reductions enacted under Chapter 60 of the Laws of 2016 (Part TT). Accordingly, effective for payrolls made on or after January 1, 2021, employers must use the revised withholding tax tables and methods in this publication to compute the amount of New York State taxes to be withheld from employees.

## Form IT-2104 — Employee's Withholding Allowance Certificate

Employers should encourage employees who completed a Form IT-2104 prior to January 1, 2021, using the worksheet to compute withholding allowances, or the charts in Part 5 or Part 6 to compute an additional dollar amount of New York State withholding, to complete a 2021 Form IT-2104 to verify if the number of withholding allowances or additional dollar amount claimed is correct for tax year 2021. Starting in tax year 2019, there are additional allowances for taxpayers claiming the Article 24 employee credit.

## Supplemental wage payment withholding rates

### Effective July 1, 2021

If you pay supplemental wages (bonuses, commissions, overtime pay, sales awards, etc.) with regular wages but do not specify the amount of each, withhold income tax as if the total were a single payment for a regular payroll period.

If you pay supplemental wages separately (or combine them in a single payment and specify the amount of each), the income tax withholding method depends partly on whether or not you withhold income tax from your employee's regular wages:

- If you withhold income tax from an employee's regular wages, you can use one of the following methods for the supplemental wages:
  - a. Withhold at the New York State supplemental rate of 13.78% (.1378)
  - b. Add the supplemental and regular wages for the most recent payroll period this year. Then figure the income tax withholding as if the total were a single payment. Subtract the tax already withheld from the regular wages. Withhold the remaining tax from the supplemental wages.
- If you did not withhold income tax from the employee's regular wages, use method **b**.

Also see federal Publication 15, *Circular E*, for a list of other payments that may be considered supplemental wages.

## New York State Special Tables for Deduction and Exemption Allowances

Applicable to Method II, Exact Calculation Method  
for New York State; see pages 16 through 19

Applicable to Dollar to Dollar Withholding Tables  
for New York State; see pages 20 and 21

Using the tables below, compute the total deduction and exemption allowance to subtract from wages.

### Table A

#### Combined deduction and exemption allowance (full year)

Using *Payroll type*, *Marital status*, and the *Number of exemptions*, locate the combined deduction and exemption allowance amount in the chart below and subtract that amount from wages, before using the exact calculation method (or dollar to dollar withholding tables) to determine the amount to be withheld.

(Use Tables B and C below if more than 10 exemptions are claimed.)

Payroll type	Marital status	Number of exemptions

### Table B

#### Deduction allowance

Use *Payroll period* and *Marital status* of employee to find the deduction allowance. Then see Table C.

Payroll period	Marital status	Deduction amount
Daily or Miscellaneous	Single	\$28.45
	Married	30.60
Weekly	Single	142.30
	Married	152.90
Biweekly	Single	284.60
	Married	305.80
Semimonthly	Single	308.35
	Married	331.25
Monthly	Single	616.70
	Married	662.50
Annual	Single	7,400
	Married	7,950

### Table C

#### Exemption allowance

Based on a full year exemption of \$1,000.

Multiply the number of exemptions claimed by the applicable amount from the table below and add the result to the deduction amount from Table B.

Payroll period	Value of one exemption
Daily/miscellaneous	\$3.85
Weekly	19.25
Biweekly	38.50
Semimonthly	41.65
Monthly	83.30
Annual	1,000

### Table D

#### Adjustment for difference between federal\* and New York withholding allowances

If the federal Form W-4 most recently submitted to an employer was for tax year 2019 or earlier, and the employee did not file Form IT-2104, the employer may use the same number of allowances the employee claimed on their federal Form W-4. For employers who elect to use the federal allowance amounts in computing wages after allowances, the following adjustments correct for the difference between the federal allowance of \$4,300\* and the New York State allowance of \$1,000 according to the particular payroll period. For tax years 2020 or later, withholding allowances are no longer reported on federal Form W-4. If the employee submits a federal Form W-4 to an employer for tax year 2020 or later, and the employee does not file Form IT-2104, the employer may use zero as the number of allowances.

To correct for the lower New York State withholding allowances: Multiply the amount below for one allowance by the number of allowances claimed. Add the product to the federally computed wages after allowances.

Payroll period	Adjustment for each federal allowance
Daily/miscellaneous	\$12.70
Weekly	63.50
Biweekly	127.00
Semimonthly	137.50
Monthly	275.00
Quarterly	825.00
Semiannual	1,650.00
Annual	3,300.00

\* The adjustments in Table D are based on the 2020 federal withholding allowance amount of \$4,300 and apply to a federal Form W-4 that was furnished to an employer for tax year 2019 or earlier. The federal allowance amount may be adjusted for inflation as prescribed by the Internal Revenue Code. For an annual payroll period, the adjustment for each federal allowance should be changed by subtracting \$1,000 from the current federal allowance amount. Other payroll periods should be recalculated accordingly.

Instructions and Examples**

**Steps for computing the amount of tax to be withheld:**

**Step 1** If the number of exemptions claimed is ten or fewer, look up the total exemption and deduction amount in Table A on page 14, according to the payroll period and marital status claimed. (If there are more than 10 exemptions, multiply the number by the exemption amount in Table C on page 14 and add it to the deduction amount from Table B.) Subtract the total exemption and deduction amount from the wages to get net wages.

For weekly payroll periods, if the amount of net wages is \$600 or less, you may use the simplified Dollar to Dollar Withholding Table beginning on page 20 to find the amount to withhold. Otherwise, continue with Step 2.

**Step 2** Locate the table on page 17 for the appropriate payroll period. Find the line on which the net wages fall between the amounts in Columns 1 and 2.

**Step 3** Following across on the line you found in Step 2, subtract the amount in Column 3 from the net wages.

**Step 4** Following across the same line, multiply the result from Step 3 by the amount in Column 4.

**Step 5** Following across on the same line, add the result from Step 4 to the amount in Column 5. The resulting sum is the amount to withhold from wages.

**New York State  
Method II Exact Calculation Method  
Married  
Instructions and Examples**

**Steps for computing the amount of tax to be withheld:**

**Step 1** If the number of exemptions claimed is ten or fewer, look up the total exemption and deduction amount in Table A on page 14, according to the payroll period and marital status claimed. (If there are more than 10 exemptions, multiply the number by the exemption amount in Table C on page 14 and add it to the deduction amount from Table B.) Subtract the total exemption and deduction amount from the wages to get net wages.

For weekly payroll periods, if the amount of net wages is \$600 or less, you may use the simplified Dollar to Dollar Withholding Table beginning on page 20 to find the amount to withhold. Otherwise, continue with Step 2.

**Step 2** Locate the table on page 19 for the appropriate payroll period. Find the line on which the net wages fall between the amounts in Columns 1 and 2.

**Step 3** Following across on the line you found in Step 2, subtract the amount in Column 3 from the net wages.

**Step 4** Following across the same line, multiply the result from Step 3 by the amount in Column 4.

**Step 5** Following across on the same line, add the result from Step 4 to the amount in Column 5. The resulting sum is the amount to withhold from wages.

## New York State Conversion of Tables

These instructions explain how to convert a table or method for the more common payroll periods in this booklet to use for other payroll periods.

### A. General rule

1. Determine the factor that will convert the payroll in question to a more common payroll period for which tables are available (i.e., quarterly is 3 times the monthly, 28-day is 2 times the biweekly, etc.).
2. Using this factor, convert the payroll to the equivalent for the more common period (quarterly  $\div$  3 = monthly, etc.).
3. Apply the table or method for the more common period to the derived equivalent wages, and get the amount to be withheld for the more common period.
4. Convert the amount that would be withheld for the more common period by the factor found in Step 1 above. This is the amount to be withheld for the payroll period in question.

### B. Using the Monthly table for Quarterly payrolls

1. Quarterly (3 months)  $\div$  monthly (1 month) = factor of 3.
2. Divide the quarterly wages by 3 to get a monthly equivalent.
3. Refer to the monthly withholding table, using the monthly equivalent wages, and get the amount that would be withheld monthly, under the appropriate exemption column.
4. Multiply the monthly withholding amount by 3 to get the quarterly equivalent. This is the amount to be withheld.

### Example: New York State - Personal Income Tax

Quarterly wages of \$6,750, married with 2 exemptions:

- (1) Factor = 3
- (2)  $\$6,750 \div 3 = \$2,250$
- (3) Refer to New York State Monthly Married Table (page 11).  
Withholding tax on \$2,250 wages, 2 exemptions = \$66.10
- (4)  $\$66.10 \times 3 = \$198.30$

### C. Using the Monthly table for 10-day payroll

1. The monthly is 3 times the 10-day payroll.
2. Multiply the 10-day payroll by 3 to get a monthly equivalent.
3. Refer to the monthly table, using monthly equivalent wages and get the amount that would be withheld monthly, under the appropriate exemption column.
4. Divide the monthly amount to be withheld by 3 to get the 10-day equivalent of the amount to be withheld.

### D. Salaries paid on a 10-month basis: Converting salaries to a 12-month basis in order to use the Monthly table (or Semimonthly, etc.)

1. Divide the annual wages by 12 to arrive at the equivalent monthly wages (if payments are made semimonthly instead of monthly, divide by 24).
2. Refer to the monthly table, using the derived equivalent monthly wages from Step 1 above, and obtain the amount that would be withheld monthly 12 times per year, under the appropriate exemption column. (If payments are made semimonthly, use that table.)
3. Multiply the amount that would be withheld 12 (or 24) times a year found in Step 2 above by 1.2 (12/10 or 6/5), to allow for the fact that withholding will occur in only 10 of the 12 months. This is the amount to be withheld from each of the 10 monthly payments or, if payments are semimonthly, from each of the 20 semimonthly payments.
